

SP-602
August 2005

Proceedings of the
DASIA 2005
- DAta Systems In Aerospace -
Conference

30 May – 2 June 2005
Sheraton Grand Hotel, Edinburgh, Scotland

organised by

In co-ordination with

CANADIAN SPACE AGENCY – CNES – ESA
EUMETSAT – EUROCONTROL

European Space Agency
Agence spatiale européenne

ORGANISING COMMITTEE

Chairman: F. Hass, Terma A/S, Head of the Eurospace Ada and S/W Engineering Panel

P. Armbruster, ESA/ESTEC
C. Brunet, Canadian Space Agency
M. Fauveau, CNES
H. Hjortnaes, ESA/ESTEC
S. Mancini, Eurocontrol
G. Moury, CNES
B. Mullet, Eumetsat
H. Pasquier, CNES
P. Plancke, ESA/ESTEC

W. Busch, EADS SPACE Transportation GmbH
A. Christen, EADS Astrium GmbH
J.F. Coldefy, EADS Astrium
P. Coppola, Intecs HRT
P. Davies, Surrey Satellite Technology Ltd.
G. Estaves, Alcatel Space
R. Gerlich, BSSE System and Software Engineering
C. Guilly, Eurospace
H.V. Heyer, Kayser-Threde
C. Joergensen, Terma A/S
P. Lacan, EADS SPACE Transportation
C. Lemercier, EADS Astrium
G. Macchia, Space Software Italia
L. Maltecca, Alenia Spazio - Laben
A. Martelli, Alenia Spazio
G. Montalto, Galileo Industries SpA
J. Nodet, Alcatel Space
R. Plet, Eurospace
M. Richard-Foy, Aonix
A. Rossignol, EADS Astrium
M. Symonds, Logica CMG
R. Szczepaniak, Cortim
R. Ward, SciSys (Space & Defence) Ltd.

Publication Proceedings of the DASIA 2005 "DATA Systems In Aerospace"
Conference, 30 May – 2 June 2005, Edinburgh, UK
(ESA SP-602, August 2005)

Contents

Foreword

F. Hass

Opening Session

Galileo Program: Status and Perspectives

T. Sassorossi

Session 1A: Software Management Standards

Chairperson: F. Hass

A Comparative Study between PMBoK/DoD and ECSS/Management Process for Software Acquisition

M. de Fátima Mattiello-Francisco, R. Arias, C. Massaki Hirata et al.

The Galileo Software Standard as Tailored from ECSS E40/Q80

G. Montalto

Session 1B: On Board Space Systems: Cameras & Telescopes

Chairperson: H.V. Heyer

Visual Navigation Chip for Planetary Landers

M. Dunstan, S. Parkes & S. Mancuso

Session 2A: New Approach to System Engineering including Reuse

Chairperson: V. Mariani

Systems Engineering Methodology Applied on a Distributed System-on-Chip Development

R. Müller, H. Eisenmann & O. Ried

RENATO, a Tool to Support Software Reuse

F. Delhaise, B. Harnett, R. Majchrzak & M. Spada

Session 2B: On Board Space Systems: Modulators Synthesizers, Memory

Chairperson: R. Ward

High Speed Digital Modulators for Multimedia Satellites and Mission Data Downlinks

W. Chen & J. Dokas

Generic Architecture for Future Mass Memories
J. Stevens, D. Durrant & S.D. Fowell

GAMMA: A Generic Architecture for Mass Memory Access
C. Honvault

Session 3A: Design Tools & Methods
Chairperson: A. Rossignol

AADL Model Transformations
P. Dissaux

A UML2 Profile for Hard Real-Time Modeling
S. Mazzini, S. Puri & A. Stragapede

Modelling Distributed Integrated Modular Systems Using the UML™ and the SysML™
F.J. Thom

Session 3B: Strong Integration & Single Chip
Chairperson: A. Christen

Building up a European Exchange Structure for IP Blocks Adapted and Qualified for Application in Aerospace Industry
A. Martin, C. Ferrer, D. Bulli, F. Bolognesi et al.

Session 4A: Test & Validation: Methods & Quality
Chairperson: P. Lacan

Systematic Generation of Test and Fault Cases for Space Application Validation
A.M. Ambrosio, E. Martins, N.L. Vijaykumar & S.V. de Carvalho

ATV On-Board SW: Incremental Development and CPU Load Control
P. Gast

ISVV Process & Facility Project
F. Høgberg, N. Mjøs, P. Hougaard et al.

Session 4B: On Board Buses and Communication
Chairperson: P. Plancke

Quality from SpaceWire and Quality into SpaceWire Systems
B.M. Cook & C.P.H. Walker

SpaceWire Remote Memory Access Protocol
S. Parkes & C. McClements

SpaceWire Internet Tunnel
S. Mills, S.M. Parkes & R. Vitulli

A VHDL Implementation of CANopen Protocol for CAN Bus On Board Spacecraft

F. Tortosa López & P. Roos

Optical Wireless Communications Onboard the Spacecraft: Current Status and the Road Forward

I. Hernandez, P. Planke, H. Guerrero, H. Guerrero, P. Pelissou & A. Santamaria

Optical Wireless MIL-STD-1553 and Serial Synchronous Buses for Intra-Spacecraft Communications

S. Rodríguez, I. Arruego, J.R. de Mingo et al.

Session 5A: Automated Code Generation

Chairperson: C. Joergensen

Automated Software Production – Quo Vadis?

R. Gerlich, R. Gerlich & D. Sigg

Software Diversity by Automation

R. Gerlich, K. Ludwig, P. Chevalley, N. Langmead et al.

Session 5B: Qualification of On Board Computers & Operating Systems

Chairperson: G. Estaves

High Performance PowerPC Based On-Board Computer, Hardware and Software Qualification

B. Hespeler, R. Braun, D. Dallmann et al.

RTEMS Operating System Qualification

J. Seronie-Vivien & C. Cantenot

Qualification of a Next Generation 32-Bit Avionics On-Board Computer

A.Z. Christen, T. Helfers & M. Schachenmeier

Session 6A: Dependability & Quality: Coding Constraints & Analysis

Chairperson: M. Richard-Foy, Aonix, France

Mission-Critical On-Board Software Using the Ada 95 Ravenscar Profile

J.F. Ruiz

Session 7A: Dependability in On Board Processing: Standards & Analysis Methods

Chairperson: P. Lacan

ARINC 653 in Space

N. Diniz & J. Rufino

Session 7B: Mixing Real & Simulated Processing in Test Environments

Chairperson: A. Martelli, Alenia Spazio, Italy

Precision Agile Control Systems: Developments in Test and Verification Equipment for Spacecraft
B.A. Oving, L. Pirson, M. Rennie et al.

Reusing Legacy Code in a Simulink Environment for Real Time Industrial Simulations: Techniques and Prototype Support Tools

C. Leorato, E. Guidolotti & D. Segneri

Session 8A: Assert: System Engineering, Tools & Methods

Chairperson: B. Mullet

The ASSERT Process: A New Lifecycle for the Development of Aerospace Systems

A. Cass, P. David & P. Di Giacomo

The Highly Reliable Infrastructure System Family for ASSERT

J. Morisse, A. Martelli & P. David

Proof-Based System Engineering in ASSERT

G. Le Lann & U. Schmid

Panel Session: “Standardisation, Reuse & Assert: Revisiting Solutions to the S/W Crisis”

Chairperson: P. David

Standards for On Board Data Systems: An Updated View

P. Plancke, P. David, C. Plummer et al.

Session 9A: Dependability in On Board Processing: Implementation

Chairperson: R. Gerlich

On Achieving True Autonomy: Using Multi-Agent Control for a SSTO Spaceplane

P. Mendham & T. Clarke

An On-Board Software Approach to Managing a Complex Space Mission and its FDIR:
The Herschel-Planck Case Study

F. Rosa, R. Miniscalco, F. Rame & F. Torchia

Session 9B: Ground & Spacecraft Development and Test Environments for full lifecycle

Chairperson: H. Pasquier

The ConeXpress System Facility (CSF) – Application of a Full Life-Cycle Concept

R. Blommestijn & P. Beerthuisen

Ground Segment Simulator: A Tool for Mission Design and Life Cycle Management

S. Stellato & E. Romani

Reuse of the Core EPM EGSE in the Ground Segment

A. Winkler, L. Günther, G. Machel & M. Schade

Session 10A: On Board Operational Monitor & Control of Faults & Quality Parameters

Chairperson: W. Busch

Mitigating SEFIs in Data Handling Architectures: A Case Study

S. Maqbool & C.I. Underwood

SAR Instrument Operation, Calibration and Verification with a Long Term Data Base

J. Mittermayer, D. Schulze, U. Steinbrecher & S. Buckreuss

GEOS: An Observation Service for Hard Real-Time Embedded Systems

F. Bossard & A. Richard

Session 10B: Galileo Test & Validation Approach

Chairperson: G. Montalto

A Navigation Signal Generator for GATE – The German Galileo Test Environment

D. Felbach, S. Schlötzer, F. Schnirch et al.

Generating Galileo Raw Data – Approach and Application

F. Zimmermann, T. Haak, C. Hill et al.

Galileo In-Orbit Validation (IOV)

F. Gottifredi, F. Martinino, S. Piazza & R. Dellago

The Engineering Database at Galileo Industries for Galileo Program

V. Mariani

Session 11A: On Board Architecture for Data Handling & Attitude and Orbit Control System: Reuse for the Future

Chairperson: G. Macchia

Data Management for the Herschel and Planck Spacecraft – Considerations for Future Missions

S. Thürey

COROT: An Ambitious Astronomical Mission Based on the Proteus Satellite Bus Family

O. Rigaud, D. Brethe & J.-M. Mesnager

Satellite Integrated Control System S/W Development and Architecture

G. Campolo, D. Pascucci & T. Cavallini

The Myriade Micro-Satellite Computer and Software: A Reliable System Based on a Low Cost Computer

X. Passot, T. Cussac, J.-L. Carayon, C. Laffaye, P.-A. Cier, N. Sicard, F. Dufrechou et al.

Session 11B: Ground System Communication Networks

Chairperson: G. Macchia

EGOS – ESA Ground Operation Software

C.R. Haddow & N. Peccia

A Novel Approach for Ground Stations Communications within the ESTRACK Network of ESA

M. Bertelsmeier, G. Buscemi & F. Mamedov

Session 12A: Data Handling & Attitude Control System: Towards strong Integration

Chairperson: J.F. Coldefy

BOSS/EVERCONTROL OS / Middleware Target Ultra High Dependability

S. Montenegro & F. Holzky

BOSS: Software and FPGA Middleware for the “Flying Laptop” Microsatellite

S. Montenegro, H.-P. Röser & F. Huber

MAEVA - Microsat Enhanced Versatile Architecture for very Integrated, Low Power Platform Systems

M. Lefebvre & J.-F. Coldefy

Toward the Development of a General-Purpose Spacecraft Attitude Control Architecture: The GOCE Experience

M. Saponara, G. Sechi, A. Tramutola & D. Andreis

Session 12B: TM/TC Analysis & Control Methods & Tools

Chairperson: J. Nodet

PrestoPlot: An Innovative Way to Display Timed Data

G. Picart & M. Smith

MUST: Mission Utility & Support Tools

J.A. Martínez-Heras, A. Baumgartner & A. Donati

On-Board Control Procedures for ESA’s Deep Space Missions Rosetta and Venus Express

C. Steiger, R. Furnell & J. Morales

Session 13A: Software only Simulators & Software Validation Facilities

Chairperson: M. Fauveau

Approaches for Pure Software System Verification Facilities

J. Koot, G. Ruwiel & P. Beerthuizen

SIMSTB: A full Software SVF in the Frame of the MDV Approach

F. Pasquier & C. Cantenot

Session 13B: Mission Control & Planning Systems

Chairperson: H. Pasquier

The MetOp LEOP Support MCS: An ESOC Efficient Development for EUMETSAT – An ESA External Customer

M. Pignède, C. Schurig & R. van Holtz

MEX Mission Planning - Concept, Implementation and Reality

S.B. Peschke, E. Rabenau, M. Denis & A. Moorhouse

Session 14A: Spacecraft Design & Constellation Simulator Environments

Chairperson: M. Fauveau

Development of System Design Supporting Software for Artificial Satellites

K. Nakagawa

LAREDO: A Formation Flying and Rendezvous and Docking Simulator Tool for Exploration Missions

D. Modrego & G. Ortega

Distributed Operational Constellation Simulation

F. Tartara & C. Cosi

Session 15A: Image Processing and Optimisation Schemes

Chairperson: G. Moury

CAT - (Compression Analysis Tool)

R.A. Gowen

Radar Altimeter Simulation with PANGU

S. Parkes, M. Dunstan, I. Martin & S. Mancuso

Panel Session “Using FPGA’s – Importance & Problems”
Chairperson: P. Plancke

Using FPGAs – Importance and Problems
P. Plancke

Feedback on Industrial Development Process
P. Cormery

From Space to Base - Leading the Era of Transformation
J. le Mauff

Atmel View for Re-Programmable Rad Hard Space FPGA
Nicolas Renaud

Actel Space FPGAs Importance & Problems - June 2005
J. Wells
